About Us

The Janki Industries was established in the year 2005 by The Managing Director “Mr. Rajnikant Khunt” & The Joint Managing Director “Mr. Sagar Khunt”. It's noted manufacturer & supplier of a wide assortment of series V3 to V10 Thrust Bearing and Open Well Bearing for Submersible Pumps and Open well Pumps components as per drawing & sample. Our range is acknowledgement for its characteristic like premium quality, high efficiency, excellent performance and long life. Owing to its unmatched characteristic, the range finds application in various industries under the Make In India concept towards the nation. Furthermore, we are capable to full-fill your any kind of requirement in variety quantity and quality which will be suitable for our machinery.

The unit is situated in a premier industrial town Rajkot-Gujarat our unit is equipped with necessary infrastructure and quality systems to manufactures of the thrust bearing for submersible pumps and open well pumps. We have our own complete machining workshop and total in house machining all process with packing finish goods. Our R & D unit performs consistently in order to stay in line with the recent market innovations and technologies.

Corporate Philosophy

Sticking to the core values always pays back.

The Company's corporate philosophy revolves around the quote: “we are what repeatedly do. Excellence, therefore, is not an act but a habit.” Janki Industries is filled by realistic ambition and propelled by action upon clearly defined action plans. No matter how tough the competition is, no matter how many challenges we face, we stand by our ethics of honesty, integrity and delivering our level best to our customer.

Growth

To grow is to keep growing.

The Company has ambitious plans to expand further and be among the prominent global players in various segments. Its success in the domestic markets serves as a stimulant in this regard. Consistent and sustained growth is far bigger thing than more 'growth'. Janki Industries has always maintained a steady growth rate. Growth charts displaying this exceptional growth are testimonials to this fact.
